### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with A. Blair Hughes on August 12, 2009.

The Examiner has made the following changes to the claims. Additions to the claims are reflected by underline (example) and deletions are reflected by strikethrough (~~example~~).

#### **Claim 47**

An automated method of detection of software vulnerabilities according to claim 44 wherein the rule set incorporates a rule which classifies a program as vulnerable if there is a copying loop—is defined as a portion of code that copies to a register from a source pointer, changes the source pointer, copies from the register into a destination pointer, changes that destination pointer, and has a control flow path from the code portion's end back to the code portion's beginning thus forming a loop.

#### **Claim 52**

A system for detection of software vulnerabilities according to claim 49 wherein the rule set incorporates a rule which classifies a program as vulnerable if there is a

copying loop ~~is~~ defined as a portion of code that copies to a register from a source pointer, changes the source pointer, copies from the register into a destination pointer, changes that destination pointer, and has a control flow path from the code portion's end back to the code portion's beginning thus forming a loop.

#### **Claim 57**

A computer readable hardware medium according to claim 54 wherein the rule set incorporates a rule which classifies a program as vulnerable if there is a copying loop ~~is~~ defined as a portion of code that copies to a register from a source pointer, changes the source pointer, copies from the register into a destination pointer, changes that destination pointer, and has a control flow path from the code portion's end back to the code portion's beginning thus forming a loop.

#### ***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance: claims 44-58 are considered allowable since when reading the claims in light of the specification, as per MPEP § 2111.01 or *Toro Co. v. White Consolidated Industries Inc.*, 199 F.3d 1295, 1301, 53 USPQ2d 1065, 1069 (Fed. Cir. 1999), none of the references of record alone or in combination disclose or suggest **the combination of limitations** specified in the independent claims and especially processing a rule generalisation to transform it into a more specific rule generalisation by employing logic of at least First-Order and adding to the rule generalisation at least one of a condition, a variable, a constant, a unification of

variables and a function based on the training data set and background knowledge relating to attributes of the training data set and consisting of at least one of concepts, facts of interest and functions for calculating values of interest from items of data.

The closest prior art of reference, Agarwal et al. (US Patent #6,782,377) teaches rule induction for learning signatures of a target class of data. A plurality of positive rules supporting examples of the target class and a plurality of negative examples for removing false positive examples are provided to the model. The effect of each negative rule on each positive rule is also determined.

Agarwal or any of the prior art of reference, either alone or in combination, fail to teach the **combination of limitations** described in independent claims 44, 49 and 54 without unduly motivating one of ordinary skill in the art to exert substantial experimental effort to integrate such combination concepts. Further to the Examiner's Amendment cited above, the Applicant's Remarks in the response dated 6/25/2009 are acknowledged and accepted.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Cuningham et al. US Patent #7,305,373

Weiss US Patent #6,523,020

4. Claims 44-58 are allowed.
